

BRIDGE PARK

DUBLIN, OH

CONNECTING TRADITION WITH A VISION FOR THE FUTURE.

Crawford Hoying's Bridge Park project will be a mixed-use destination centered around connectivity. Spanning 30 acres adjacent to the Scioto River, what once was an unproductive retail center is now being transformed into a bustling walkable community. The concept of this new neighborhood is a direct response to national and local real estate market trends.

Live in a walkable, active neighborhood in Dublin's Historic Core. You can rent one of the executive finish apartments, or if you're in the market you can own one of over 100 for-sale condominiums.

Locate your office in the center of everything by carving out your own space in the 323,000 square feet of new Class-A office being built.

Whether you're a resident, office tenant, or visitor, make use of nearly a dozen new and diverse restaurants, a fitness center, a grocery store, and entertainment options. Guests can stay at a new riverfront hotel or hold events at a new conference center. And all the above will enjoy pedestrian access to the restaurants, businesses, and shops of Historic Downtown Dublin.
